Art Unit: 1634

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-4 and 6-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims are vague, indefinite, and incomplete.

- (a) The recitation of "in which the gene-disrupted strain to the chemical is replaced with a transformation marker" (claim 1) is vague and indefinite because the meaning of the phrase within the context of the claim is not understood.
- (b) The recitation of "such as" (claim 6) is vague and indefinite because it is not clear whether what follows is a claim limitation or not.
- (c) Claims 1-4, 6-20, and 23 are incomplete because the claims do not recite any step of determining a result or describing the meaning of any result following culturing.
- (d) Claims 21 and 22 are vague, indefinite, and incomplete because the kits of claims 21 and 22 are not defined by the methods of claim 1, from which claims 21 and 22 depend.

The following is a quotation of the fourth and fifth paragraphs of 35 U.S.C. 112:

Subject to the following paragraph, a claim in dependent form shall contain a reference to a claim previously set forth and then specify a further limitation of the subject matter claimed. A claim in dependent form shall be construed to incorporate by reference all the limitations of the claim to which it refers.

A claim in multiple dependent form shall contain a reference, in the alternative only, to more than one claim previously set forth and then specify a further limitation of the subject matter claimed. A multiple dependent claim shall not serve as a basis for any other multiple dependent claim. A multiple dependent claim shall be construed to incorporate by reference all the limitations of the particular claim in relation to which it is being considered.

Art Unit: 1634

Claims 21 and 22 are improper dependent claims because kit claims 21 and 22 do not further limit the claimed method of claim 1, from which claims 21 and 22 depend.

Claims 1-4 and 21-23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Roemer et al (U.S. Patent Application Publication 2001/0031724). Roemer et al teaches the use of gene-disrupted transformation cassettes that are approximately 1 kb in length (*e.g.*, see Figure 2 and paragraph 0028) in yeast hosts for the purpose of identifying whether a chemical is present. For example, see paragraphs 0002-0013, 0028-0032, and 0058-0077 and Figure 2. Thus, Roemer et al meets all of the limitations of the broad method claims (1-4 and 23) and the broad kit claims (21 and 22).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
